**INTRODUCCIÓN:**

Esta actividad consiste en crear nuestra propia página web personal o portfolio usando el framework de Tailwind.

## DESARROLLO:

### DIEGO PASTRANA

👋 Hello, I'm Diego, a student in the Higher Cycle of Networked Computer Systems Administration.

💻 In my free time, I enjoy creating 3D digital art and 3D printing.

🔧 I'm an enthusiast of the 'maker movement'.

🔧 I enjoy repairing and assembling PCs, which is a hobby that I usually practice by helping friends and acquaintances.

#### Some of my repositories:

- 3D Models Repository
- Render Repository
- Introduction to Packet Tracer reports Repository
- My Operating System Deployment Repository
- My Markup Language Classes Repository
- My Hardware Classes Repository

#### The programs that I use:

VISUAL STUDIO CODE

PACKET TRACER

XAMPP

VIRTUALBOX

BLENDER

ORCASLICER

SIMP

DAVINCI RESOLVE

#### The languages and frameworks that I use:

HTML

CSS3

MYSQL

JAVA

En esta practica de Tailwind he investigado para poder usar este framework y con esos conocimientos he creado mi propia web personal, en casi la totalidad del código he usado clases de Tailwind para la estética de la página. En general he usado divs a los que les he puesto dichas clases.

Lo he estructurado para que tenga una presentación en la parte superior, otro apartado con mis repositorios principales de Github con mis proyectos, otro apartado con los programas que se usan, otro para lenguajes, frameworks y certificaciones; y por último otro div u apartado con mis redes sociales donde muestro mis habilidades relacionadas con el ámbito.

### **CONCLUSIÓN:**

Esta actividad de Tailwind me ha parecido muy buena ya que además de haber aprendido a usarlo he logrado crear yo mismo mi propia web personal, lo cual creo que puede beneficiarnos profesionalmente en un futuro y que podemos ir mejorando a lo largo del tiempo mientras adquirimos más conocimientos.
